(54) Title: CUP LID FOR DISPENSING HOT FLUIDS

(57) **Abstract:** The present invention relates to a container lid for sealing a container used to hold fluids and provides a reservoir for collection of a portion of bulk fluid contained in the container to speed cooling relative to the bulk fluid and allows speedier drinking of hot fluids with reduced risk of scalding. The present invention also relates to methods for allowing speedier drinking of hot fluids with reduced risk of scalding by utilizing the reservoir of the inventive container lid.
